

## 1/4" FLEX HANDLE 200 MM

- Articulated head with ball detent retainer on the drive end for secure socket connection in high torque situations
- Constructed from durable high-quality chrome vanadium with satin finish for superior strength and control
- Ergonomic bi-material grip designed for comfort during prolonged use
- Adheres to DIN 3122F standards, offering reliable performance

The TengTools 200 mm 1/4" square drive flex handle M140012-C is an efficient tool for precise leverage when applying additional torque on stubborn nuts and bolts in confined spaces. The flexible head is well suited for manoeuvring in limited spaces and at challenging angles. A secure socket connection is guaranteed by the ball detent retainer on the drive end, which is crucial for preventing socket detachment in high-torque scenarios. It features a satin finish handle with a comfortable bi-material grip, enhancing control in environments prone to oil or moisture. Made from high-grade chrome vanadium and adhering to DIN 3122F standards, this flex handle is built to endure daily demands of professional use in automotive repair, electronics, or any mechanical field.

### General information

**Country of origin:** Taiwan  
**Barcode:** 5020385141179  
**Tariff code Europe:** 8204200000  
**ECCN US:** EAR99  
**UNSPSC:** 27111725

### Dimensions
