

3/8" FLEX HANDLE 300 MM

- Articulated head with ball detent retainer on the drive end for secure socket connection in high torque situations
- Constructed from durable high-quality chrome vanadium with satin finish for superior strength and control
- Ergonomic bi-material grip designed for comfort during prolonged use
- Adheres to DIN 3122F standards, offering reliable performance

The TengTools 300 mm 3/8" square drive flex handle M380012-C is a versatile and robust tool designed for effective leverage and accuracy when dealing with tightly fastened or corroded fasteners. Its articulated head is particularly useful for navigating through tough angles and tight spaces, a common challenge in many professional applications. Equipped with a ball detent retainer at the drive end, it ensures a stable and secure socket connection, essential for maintaining safety in high-torque applications. This flex handle is crafted from premium chrome vanadium, offering exceptional strength and endurance to withstand the demands of intensive use. The handle boasts a satin finish, providing improved grip and handling, especially in conditions where moisture or grease is a factor. The bi-material grip has an ergonomic design, reducing the strain on the users during extended tasks. Compliant with DIN 3122F standards, this tool is a reliable asset in challenging professional settings.
