- Integrated key lock
- Compatible with TengTools Tool Control System

The TengTools TCMME217KA is a comprehensive 217-piece tool kit integrated into a classic 27" red roller cabinet, designed to meet the requirements of professional applications. The tools are organised in precision-cut, high-density, three-colour EVA foam inlays across four of the cabinet's seven drawers, leaving additional space for future expansion and customisation. They are compatible with the TengTools Tool Control System which ensures quick identification of missing tools, improving workplace efficiency and safety. The TCMME217K tool kit provides a comprehensive selection of socketry with 1/4", 3/8", and 1/2" square drive systems, featuring reliable 72-teeth ratchets, along with standard and deep metric sockets ranging from 4 mm to 24 mm. Accessories such as extension bars, universal joints, and drive adaptors enhance versatility, while combination spanners, two adjustable wrenches, and a curved jaw power grip plier address a variety of fastening tasks. General-purpose tools include hammers, measuring equipment, chisels, punches, a utility knife, and a hacksaw, complemented by pliers for gripping and wire cutting. A full range of screwdrivers is paired with a 1/4" ratcheting bits driver and an extensive bit selection for multi-fastener compatibility. Additionally, the kit includes ball point hex keys in metric and AF sizes, as well as TX keys, for precise fastening needs. Constructed from heavy-gauge steel with a red powder-coated finish, the cabinet ensures durability and resistance to corrosion. The seven drawers are rated for 30 kg each, are fully extendable for easy access and operate on three-step ball-bearing slides. Five drawers measure 76 mm in height, while two deeper drawers provide 151 mm of storage for larger tools. The mobility of the roller cabinet is supported by pre-assembled heavy-duty 5" x 2" castors—two fixed and two braked swivel castors—along with a robust metal side handle. The integrated key lock secures all drawers, protecting tools during transport or storage.
