

26" PRO35™ STACK TOOL STORAGE 16 DRAWERS RED

- 3 separate tool storage units stacked for a comprehensive 16-drawer solution
- 30 kg capacity per drawer, each fully extendable and equipped with smooth running ball bearing slides and noise reducing EVA mat
- Features 5" heavy duty castors and 3-digit combination locks for secure storage
- Constructed from heavy gauge steel treated with a 5-step phosphate-free rust prevention process and a powder coat finish
- Compatible with TengTools Tool Control System for customizable tool organization

The TengTools 26" PRO35™ stack with 16 drawers TSS26R16 in matte red is a solution crafted for professionals requiring a comprehensive mobile tool storage system. This stack system combines three storage units: a 4-drawer tool chest, a 3-drawer tool chest, and a 9-drawer roller cabinet. Together, they form a towering yet compact unit measuring 680 mm in width, 460 mm in depth, and a total height of 1570 mm (with castors mounted). This assembly offers an impressive 16 drawer setup, each fully extendable and equipped with smooth running ball bearing slides for consistent performance. The drawer capacities are between 30 to 40 kg, ensuring each can handle a substantial load. The drawers of the top and middle tool chests are designed to hold four TengTools TC1 modules each, while the roller cabinet drawers can accommodate the same plus a TCX4 module, providing extensive customization possibilities within the TengTools tool control system. Each drawer is lined with an EVA mat for protection and noise reduction. Both tool chests feature recessed side handles, offering flexible mobility in dynamic workshop settings. The roller cabinet includes a comfort grip handle on the side for easy movement. The unit is supported by heavy-duty castors: two 5" braked swivel castors and two 5" fixed castors, offering both mobility and secure positioning. Fixing brackets are included to securely attach the TengTools tool chest to the cabinet to prevent tipping. To safeguard the tools each unit is equipped with a 3-digit combination lock. Constructed from heavy gauge quality steel treated with a 5-step phosphate-free rust prevention process for corrosion resistance, the stack system is built to endure professional use.
